SUMMARY

I am a Frontend Developer with over 6 years of experience in React.js, Vue.js, and JavaScript, focusing on clean code, UI/UX, and performance optimization. I excel at collaborating with cross-functional teams, solving complex problems, and delivering innovative web solutions.

WORK EXPERIENCE

Software Engineer, HowNow

Sept 2025 - Present

- Migrating the platform from Rails to React, building shared components, shaping front-end system design, and integrating state management.
- Led system-wide accessibility, ensuring compatibility with screen readers and keyboard navigation across various browsers.
- Managed and developed frontend for rewards integration for courses and pathways.
- Led front-end development for UK Government-specific features, including a new dashboard supporting 500K+ users.
- Implemented 26 third-party integrations to work dynamically across both web and browser extensions.

Software Development Engineer 1, Fynd

Nov 2022 - Sept 2025

- Developed and led the frontend for the finance module with 30+ Vue.js components.
- Worked on the subscription module for seller onboarding using React.js and Node.js.
- Worked on frontend and backend for "Store OS," a POS refund interface for Reliance outlets.
- Developed automation testing scripts in Node.js using Mocha.

UI Developer Level 2, Media.net

Dec 2018 - April 2022

- Led the development of a job recommendation website using Vue.js, React.js and PHP.
- Worked with cross-functional teams to develop web ads, landing pages, and other products.
- Delivered 50+ WordPress websites, including custom themes, within tight deadlines.
- Implemented ReCAPTCHA and tracking functionalities across teams.
- Managed three core projects dedicated to delivering multiple advertisement layouts on daily and weekly cycles.
- Built internal tools for improving team efficiency and dashboard for tracking team work statistics.
- Built a company-wide birthday/anniversary bot and contributed to training and hiring efforts.
